CAREER HISTORY

FULL STACK WEB DEVELOPER

Good Dog , Los Angeles | Nov 2018 - Aug 2019
www.gooddog.app

Good Dog is a pet tech startup that utilizes mobile technology and gamification to deepen the bond between pets and their owners.

- The client was developed using JavaScript, React JS, Facebook's third party login and the backend utilizing SQL Server, and ASP.NET
- Developed front end components that enabled forum functionality (enabling Reddit style comments) within any user interface using React.
- Created Content Management System for administrators that also included rich text editing, content validation, and content metadata tagging features.
- Developed middleware to manage backend interactions between model and control layers using ASP.NET.
- Created SQL relational database for permanent storage by utilizing stored procedures, services, and controllers to create RESTful API endpoints and implement business rules.
- Coordinated project responsibilities using Git SCM and communicate progress with team through Trello boards and daily stand-ups, have weekly demonstrations and discussions with client, and use TFS/GIT in a Continuous Integration environment.
- Technologies also used: Amazon Web Services, Google API.

SMART CITIES & FUTURE OF WORK Addi HACKATHON

Feb 2019
Conceptualized and created a web app that would dynamically bring the Long Beach community together via City of Long Beach-provided APIs and Open Data Portal.

- Utilizing Google API, the web app was based around the concept of a neighborhood watch to report any thefts or incidents.

IT SUPPORT SPECIALIST, RELATIONSHIP MANAGER, PHOTOGRAPHER

Los Angeles | June 2012- September 2018

- Provided support for small businesses for networking as an IT support specialist at DyOps Inc., Relationship Manager on a team at Bank of America, N.A., and created a small business as a freelance photographer.
